

## Awning/Marine/Banner Fabrics

### Cleaning Instructions

Sunfield fabrics are subjected to a special treatment with a fluorocarbon which gives the following characteristics:

- Resistance to natural build up of dirt.
- Oil and water –repellency for a long time.
- Excellent dimensional stability.

However, it is advisable:

- To remove dust periodically from the dry awning with a brush or a vacuum cleaner.
- To wash with clean water at a temperature of not more than 86 F (30 C), when the dirt is persistent.
- To use a trichloroethylene blotter; or a common dry cleaner for grease stains.
- To never use any other chemical product.
- To avoid the build up of water bags in the middle of the awning always keeping the fabric in tension and with an adequate gradient.
- To never roll up the cover or awning when the fabric is wet.
